

Neuropharmacology, Drug Delivery and Cancer Research Laboratory (NDCL)

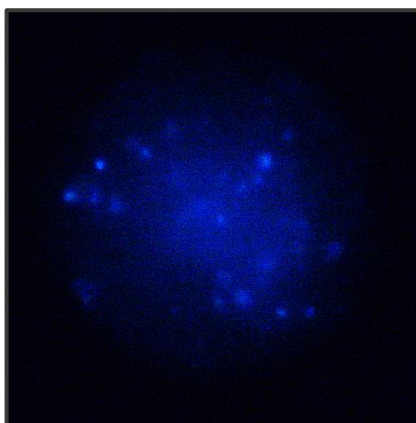

Dr. Narendra Kumar, Assistant Professor, Biochemistry Department, DRC

Ms. Anna Senrung, Assistant Professor, Zoology Department, DRC

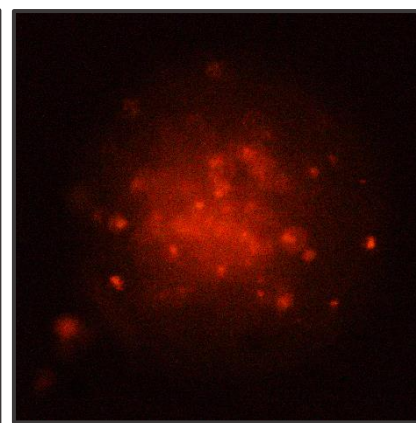

Neuropharmacology and Drug Delivery Laboratory (NDDL), Daulat Ram College (DRC), University of Delhi, India, was constituted in 2018 with Late Dr. Amar Jyoti, Assistant Professor, Zoology Department, DRC, as the Principal Investigator. He envisioned to bring the college at par with the leading research institutions of the country. In an effort to keep with the passion and enthusiasm he had for the college and its students, this laboratory has been training undergraduate students on basics of cancer cell culture and techniques as an introduction to experimental research in cancer biology. We hope that through this laboratory we will be able to encourage the Life Sciences students of DRC to achieve greater heights in the field of science and technology.
